Release Notes. DWG 3D CAD package V 1.3

Released: 09/2025

Description of content

This collection represents all 3D DWG models that are currently available for public release. Whatever is not in this collection is either not available at all (e.g. legacy products) or it is not available yet, because it pertains to a product that has been released so recently that the CAD collection has not been updated yet. In any case, the only and most up to date source for d&b DWG CAD data is this collection. We will update it continuously as soon as more/new data is available.

We have generated 3D models for all loudspeakers individually as well as for typical assemblies with all available and compatible accessories. Each part is inserted as its own block reference which makes it easy to extract and reuse single items for your own CAD projects. The internal layer structure is:
d&b_loudspeakers
d&b_accessories
d&b_amplifiers
d&b_electronics

All 3D models are available in AutoCAD 2013 and AutoCAD 2018 format to maximize compatibility with common third-party CAD software.

Intended use

The CAD files in this library are intended to be used for accurate technical visualizations of d&b products with their mounting accessories and provide accurate data of mounting points for which third-party mounting accessories are permitted. We have omitted proprietary mounting points and simplified constructional details that are not relevant to the purpose of these files for product liability and IP reasons. Should you require a customized mounting solution that uses these proprietary mounting points, please contact your closest d&b representative to initiate the appropriate design process through our mechanical engineering department.

Why are there no “new” 2D versions of these files?

Generating all thinkable 2D projections from all files would have resulted in an astronomical file count. We therefore kindly ask users who require 2D projections of any of the 3D files to generate them from the 3D files. Useful AutoDesk commands in this regard are:
“PERSPECTIVE” with argument 0, “FLATSHOT”.

Release Notes. DWG 3D CAD package V 1.3

Released: 09/2025

This package contains the following dwg CAD files

Series	File name	content						
		speaker 1	speaker 2	speaker 3	accessory 1	accessory 2	accessory 3	accessory 4
